Independent Auditors' Report

The Board of Trustees
Puerto Rico System of Annuities and Pensions for Teachers
San Juan, Puerto Rico

We have audited the accompanying statements of plan net assets of the Puerto Rico System of Annuities and Pensions for Teachers (the System) as of June 30, 2006 and 2005 and the related statements of changes in plan net assets for the years then ended. These financial statements are the responsibility of the System's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets of the System at June 30, 2006 and 2005 and the changes in its net assets for the years then ended in conformity with accounting principles generally accepted in the United States America.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The Management's Discussion and Analysis presented on pages 3 through 7 and the supplemental schedules of employer contributions and funding progress presented on pages 33 and 36 are supplementary information required by the Governmental Accounting Standards Board, and are not a required part of the basic financial statements.

650 Muñoz Rivera Ave., Suite 502, San Juan, PR 00918-4149 • PO Box 195607, Hato Rey Station, San Juan, PR 00919-5607
Phone 787.641.9801 • Fax 787.641.9809 • www.parissicpa.com

We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information presented in the Management's Discussion and Analysis and supplemental schedules and, therefore, express no opinion on them.

The Puerto Rico System of Annuities and Pensions for Teachers ("the System") presents management's overview of the administrative and operational activities that had an impact on the System's assets for the fiscal year ended June 30, 2006 and 2005. The System administers retirement and other participant benefits, such as personal, cultural and mortgages loans, occupational and non-occupational disability annuities and death benefits.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the System's basic financial statements, which are comprised of the following: 1) Statement of Plan Net Assets, 2) Statement of Changes in Plan Net Assets, and 3) Notes to the Financial Statements. Additional information is also presented to supplement the basic financial statements.

Statement of Plan Net Assets and Statement of Changes in Plan Net Assets

Both these statements provide information about the overall financial status of the System. The Statement of Plan Net Assets includes all of the System's assets and liabilities, with a difference reported as net assets. The Statement of Changes in Plan Net Assets discloses changes in the System's assets during the fiscal year. Comparative information for the years ended June 30, 2006 and 2005 is presented.

Notes to the Basic Financial Statements

The notes to the financial statements provide additional information that is essential for an understanding of the data provided in the Statements of Plan Net Assets and Changes in Plan Net Assets.

Supplementary Information

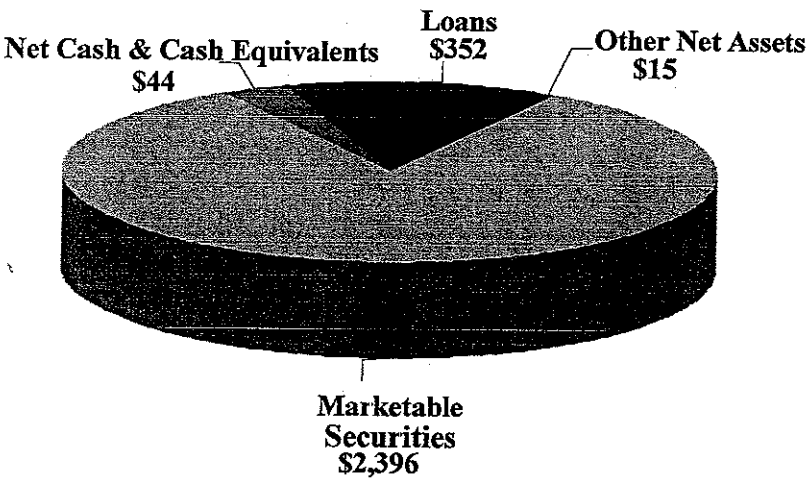
The required supplementary information consists of two schedules and related notes concerning the funded status of the pension plan administered by the System.

Financial Highlights

The System's net assets as of June 30, 2005 increased from approximately $2,561 million to $2,807 million as of June 30, 2006. The increase was primarily due to the net appreciation in the fair value of the System's investment portfolio. The amount of $2,807 million in total net assets consists of the following:

- $2,396 million in marketable securities
- $352 million in loans to participants
- $44 million in net cash and cash equivalents
- $15 million in other net assets (liabilities)

Total net assets table (in millions):



Following is a comparison of certain items within the financial statements:

- The System's assets exceeded liabilities by $2,807 million (net assets) for the fiscal year ended June 30, 2006 when compared to the prior year which assets exceeded liabilities by $2,561 million.
- The fair value of the System's investments (excluding loans to participants) at June 30, 2006 amounted to $2,396 million, compared to $2,135 million at June 30, 2005.
- Administrative expenses decreased from approximately $25.8 million for the year ended June 30, 2005 to approximately $22.7 million for the year ended June 30, 2006.
- The System's funded ratio of the actuarial accrued liability at June 30, 2004 was 51%.

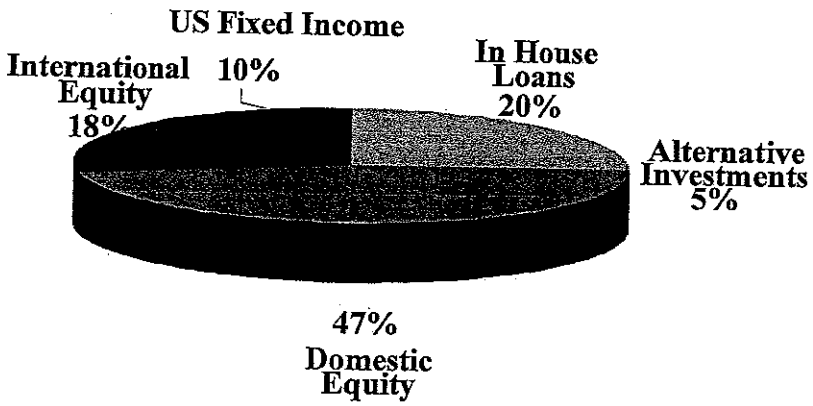
Financial Analysis of the System

The System provides retirement benefits to teachers within the public education system of the Commonwealth of Puerto Rico. The System's net assets held in trust for benefits at June 30, 2006 amounted to approximately $2,807 million, an increase of approximately $246 million from approximately $2,561 million at June 30, 2005. Additions to the System's net assets held in trust for benefits include employer and member contributions, as well as investment income. For fiscal year 2006, employer and member contributions decreased by approximately $3.6 million, from approximately $252 million during fiscal year 2005 to approximately $249 million during fiscal 2006. The decrease is mainly due to the fact that employer and employee special contributions related to the 2001 Early Retirement Program lasted until fiscal year ended June 30, 2006. The System recognized a net appreciation in the fair value of investments of approximately $258 million for fiscal year 2006.

In fiscal year 2004, the System started a re-engineering and mechanization project that involves different areas; such as Pensions, Loans and Finance. As of June 30, 2006, $4.8 million was capitalized as a result of the project in progress (an increase of approximately $400,000 with respect to fiscal year 2005).

As of June 30, 2006, the long-term debt related with Bonds Payable (see Note 9 in Financial Statements) amounted to $20.4 million. In fiscal year 2006, there were payments of principal and interest related to Series A and payments of interest related to Series B.

During the fiscal year ended June 30, 2006, the System (i) went through a rebalancing of its investment portfolio in order to be at its target asset allocation (within the fixed income sector it contemplated the sum of US Fixed Income and In-House Loans to participants) and (ii) hired a new investment manager under the international sector to complement the existing strategy. The asset mix of the fund generated a positive gross return of 13.00% for the year ended June 30, 2006. The target asset mix is as follows:



Economy

During fiscal 2006 the Federal Reserve continued to increase interest rates at every meeting to combat the possibility of inflation. The Fed Funds rates started fiscal year 2006 at 3.25% and finished at 5.25% an increase of 200 basis points. Rising rates together with higher energy costs resulted in a decline in the consumer sentiment index during fiscal year 2006. The wary consumer also impacted the US housing market negatively and there are strong signs that the housing boom has come to an end and has the potential to turn into a bust. For most of the period we saw a strengthening of the dollar versus the euro and the yen, but as the U.S. equity markets turned in May 2005, the dollar lost most of what it had gained back to the euro. On a positive note, corporate profits were strong during the fiscal year 2006 and job growth remained steady with the US unemployment rate hovering just under 5%.

Domestic Equity Overview

Despite higher energy prices, rising interest rates and a slowing housing market, the U.S. economy showed strong growth during fiscal year 2006. As a result, the domestic equity indices were all in positive territory for the year. The major U.S. stock exchanges saw positive returns with the NYSE up 15.87% and the NASDAQ up 6.47%. The broad domestic equity market as measured by the Russell 3000 Index was up 9.56%. During the fiscal year, small cap stock continued to outperform large cap stocks and Value prevailed over Growth among both large cap and small cap stocks, although the difference was much more significant among large cap stocks than small cap stocks.

At June 30, 2006, the System held approximately $1,330 million in U.S. equity securities which represents 48% of the total investment portfolio. During fiscal year ended June 30, 2006, investments in U.S. equity securities earned gross returns of approximately 10.16%.

International Equity Overview

Non-U.S. Equity Markets continued to deliver strong performance during fiscal year 2006. The MSCI EAFE Index was up 26.56% for the period, helped in part by a weaker dollar.

As of June 30, 2006, the System held approximately $556 million in foreign equity securities which represents 20% of the total investment portfolio. During fiscal year ended June 30, 2006, these securities earned a gross return of 28.22%.

Fixed Income Overview

Fiscal year 2006 was not a positive period for the bond market as the Lehman Brothers Aggregate Index returned -0.81%. Corporate underperformed Treasuries of the same maturity, while the other spread sectors all outperformed Treasuries. Mortgage Backed and Asset Backed Securities were both in positive territory for the period.

As of June 30, 2006, the System held approximately $463 million in domestic fixed income securities which represents 17% of the total investment portfolio. The System's fixed income money managers had a gross return of .71 % for the fiscal year ended June 30, 2006.

Other Investments and Transactions

At June 30, 2006 and 2005, the System held approximately $352.3 million and $345.3 million in loans to participants, respectively, which represents 13% of the total investment portfolio. As of June 30, 2006 these loans consist of $105 million in mortgage loans, $246 million in personal loans and $1 million in cultural trip loans. The loans to participants had a gross return of 9.71% for the fiscal year ended June 30, 2006.

As of June 30, 2006 the System has participation in Limited Partnerships of Private Equity Investments for an approximate value of $46.2 million which represents approximately 2% of the investment portfolio. These investments had a gross return of 28.41% for the fiscal year ended June 30, 2006.

The System earns additional investment income by lending investment securities to brokers via its custodian's securities lending program. The brokers provide collateral to the System and generally use the borrowed securities to cover short sales and failed trades. The cash collateral received from the brokers is invested in order to earn interest. For fiscal year 2006, income from the custodian's securities lending activity amounted to approximately $809,000.

Funding Status.

The System performs an actuarial valuation of its assets and obligations at least every other year. The most recent actuarial valuation was performed as of June 30, 2004. According to such valuation, the System's unfunded liability amounted to approximately $2.3 billion with a capitalization level of 51%.

As a means to protecting the System's financial health, Law 91 of March 29, 2004 established the practice of requiring an actuarial study and identifying the funding prior to granting new benefits.

Requests for Information

This financial report is designed to provide a general overview of the System's financial status, comply with related laws and regulations, and demonstrate commitment to public accountability. Questions concerning any of the information provided in this report or requests for additional information should be addressed to the Puerto Rico System of Annuities and Pensions for Teachers, Capital Center Building, #235 Arterial Hostos Ave., North Tower, 8th Floor, Hato Rey, PR 00919-1879.

The accompanying notes are an integral part of the financial statements.

1. Organization and Summary of Significant Accounting Policies

The Puerto Rico System of Annuities and Pensions for Teachers (the System) was created by Act No. 91 of March 29, 2004 that superseded Act No. 218 of May 6, 1951. The System is considered an integral part of the Commonwealth of Puerto Rico (the Commonwealth) financial reporting and is included in the Commonwealth's financial statements as a pension fund. The System, as a governmental retirement plan, is excluded from the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

The responsibility for the proper operation and administration of the System is vested in a Board of Trustees (the Board). The Board is comprised of nine members, as follows:

- Three Ex-Oficio members which are the Secretary of the Treasury, The Secretary of Education, and the President of the Government Development Bank, or their respective representatives;
- One member who is the Chairperson or representative of a teacher's organization designated by the Governor of the Commonwealth of Puerto Rico;
- Three teachers of the System, one of which represents currently certified teachers in active service, and two who represent retired teachers. These three teachers are appointed by the Governor of the Commonwealth of Puerto Rico.
- One member who is the Chairperson or representative of the entity that represents the proper unit under Act No. 45 of February 25, 1998, as amended.
- One additional member, as representative of the public interest, with knowledge of and experience in the administration and operation of financial systems, appointed by the Governor of the Commonwealth Puerto Rico.

The following are significant accounting policies followed by the System in the preparation of its financial statements:

Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with the provisions of Governmental Accounting Standards Board Statement No. 25 (GASB Statement No. 25), "Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans". Participating employee and employer contributions are recognized as revenues in the period in which the employee services are rendered. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan.

1. Organization and Summary of Significant Accounting Policies (continued)

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) in the United States requires management to make estimates and assumptions that affect the reported amounts of net assets held in trust for pension benefits, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions to net assets held in trust for pension benefits during the reporting period. Actual results could differ from those estimates.

Cash and Cash equivalents, Cash with Fiscal Agent, Restricted Cash

Cash and cash equivalents consist of "overnight deposits" with the custodian bank. Cash with fiscal agent represents a fund account the System has at the Department of Treasury for the payment of operational and administrative expenses. Restricted cash deposited with GDB consists of payments received from in-house loans holders to service the loans; and the restricted cash deposited with a commercial bank represents an escrow account for the bonds payable.

Investments

Investments are carried at fair value. The fair value of notes, bonds and stocks is based on quotations obtained from national securities exchanges. Securities transactions are accounted for on the trade date. Realized gains and losses on securities are determined by the average cost method and are included in the statement of changes in plan net assets.

The fair value of private equity fund investments is determined by the applicable fund manager.

Loans to Plan Members

Mortgages, personal and cultural trip loans to plan members are stated at their outstanding principal balance. No allowance for uncollectible amounts has been established since loans to plan members are collected through payroll withholding and secured by mortgage deeds, plan members' contributions and any unrestricted amount remaining in the escrow funds. Maximum amounts that may be loaned to plan members for mortgage and cultural trip loans are $100,000 ($150,000 if the spouse is also a plan member) and $5,000, respectively. The maximum amount of personal loan to be granted to current participating employees is up to 90% of their contributions and $3,000 in the case of retirees currently receiving benefits.

1. Organization and Summary of Significant Accounting Policies (continued)

Capital Assets

Capital assets include building, furniture and equipment, capital leases and projects in progress. The System defines capital assets as assets, which have an initial individual cost of $500 or more at the date of acquisition and have a useful life of four or more years. Capital assets are recorded at historical cost or at estimated historical cost if actual historical cost is not available. Donated capital assets are recorded at their estimated fair value at time of donation.

Capital assets are depreciated on the straight-line method over the assets estimated useful life. There is no depreciation recorded for projects in progress. The estimated useful lives of capital assets are as follows:

	Years
Building	40
Buildings improvements	10
Equipment, furniture, fixtures, and vehicles	4-10

Long-Lived Assets

The System reviews the carrying amount of its long-lived assets and identifies assets for possible impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. Any long-lived asset held for disposal is reported at the lower of their carrying amount or fair value less cost to sell.

Guarantee Insurance Reserve for Loans to Plan Members

Premiums collected and benefits claimed are recorded as additions and deductions of the guarantee insurance reserve for life insurance on loans to plan members, respectively.

1. Organization and Summary of Significant Accounting Policies (continued)

Future Adoption of Accounting Pronouncements

The GASB has issued the following accounting standards that have effective dates after June 30, 2006:

- GASB Statement No. 43, *Financial Reporting for Post-employment Benefit Plans Other Than Pension Plans,* which is effective for fiscal years beginning after December 15, 2005.
- GASB Statement No. 45, *Accounting and Financial Reporting by Employers for Post-employment Benefits Other than Pensions*, which is effective for fiscal years beginning after December 15, 2006.

The impact of these statements on the System's basic financial statements has not yet been determined.

2. Plan Description

The System is a defined benefit plan sponsored by the Commonwealth. Substantially, all active teachers of the Commonwealth's Department of Education are covered by the System under the terms of Act No. 91 of March 29, 2004 that superseded Act No. 218 of 1951. The new law gives the System's active employees as of March 29, 2004 the option to participate in the plan. Employees recruited by the System after the approval of the new law become members of the plan. All active teachers of the Department of Education at the date of employment become plan members of the System. Licensed teachers working in private schools or other educational organizations can be members of the System at their own choice as long as the required employer and employee contributions are satisfied.

At June 30, 2006 the membership consisted of approximately:

Retirees and beneficiaries currently receiving benefits	28,000
Current participating employees	49,500
Total membership	77,500

2. Plan Description (continued)

The plan members of the System are eligible for the benefits described below:

Retirement Annuity

Plan members are eligible for monthly benefit payments determined by the application of stipulated benefit ratios to the plan member's average compensation. Average compensation is computed based on the highest 36 months of compensation recognized by the System. The annuity for which a plan member is eligible is limited to a minimum of $300 per month and a maximum of 75% of the average compensation.

The plan members are eligible for retirement annuity upon complying with the following:

Age	Years of Creditable Services	Retirement Annuity Compensation
Fifty (50)	Thirty (30) or more	75% of average compensation
Under Fifty (50)	Thirty (30) or more	65% of average compensation
Sixty (60)	At least Ten (10) but less than Twenty-five (25)	1.8% of average compensation times years of service
Fifty (50)	At least Twenty-five (25) but less than Thirty (30)	1.8% of average compensation times years of service
Forty-Seven (47) but less than Fifty (50)	At least Twenty-five (25) but less than Thirty (30)	95% of the annual pension that would have received with 50 years of age

Deferred Retirement Annuity

A participating employee who terminates service before age 60, after having accumulated a minimum of ten years of creditable services, qualifies for a deferred retirement annuity payable beginning at age 60. A participating employee who has completed 25 or more years of creditable services and is under the age of 47 at termination, qualifies for a deferred retirement annuity payable beginning at age 47. The vested rights described above are provided if his/her contributions to the System are left within the System until the attainment of the respective retirement age.

Occupational Disability Annuity

A participating employee, who as a direct result of the performance of his/her occupation becomes disabled, is eligible for an annuity of 1.8% of average compensation based on the highest sixty (60) months or the number of months of creditable services, if less than five years, recognized by the System, times years of creditable services; but not less than $300 per month.

2. Plan Desc ription (continued)

Non-occupational Disability Annuity

A participating employee disabled for causes not related to his/her occupation, and with at least five years of credited service, is eligible for an annuity of 1.8% of average compensation based on the highest sixty months recognized by the System, times years of service; but not less than $300 per month.

Death Benefits

Pre-retirement

- Beneficiary – the contributions and 2% interest accumulated as of the date of death after discounting debts with the System, plus an amount equal to the annual compensation at the time of death.

Post –retirement

- Surviving spouse - 50% of retiree's pension.
- Children – 50% of the retiree's pension to the children of age under 22 or disabled.
- Otherwise the excess, if any, of the accumulated contributions at the time of retirement over the total annuity benefits received before death, limited to a minimum of $1,000 are refunded to the beneficiaries.

Cost-of-Living Adjustments

Act No. 62 of 1992 provided, subject to the approval of the Legislature, for increases of 3% every three years in pensions to those plan members with three or more years of retirement. In years 1995, 1998, 2001 and 2004 the Legislature has replicated the benefit granted per Act No. 62. This benefit is funded by the General Fund of the Commonwealth.

Refunds

A participating employee who ceases his/her employment with the Commonwealth without right to a retirement annuity has the right to a refund of the employee contributions paid to the System plus any interest earned thereon.

2. Plan Description (continued)

Early Retirement Program

On January 27, 2000 Act No. 44 was approved, which provided that effective March 9, 2000, plan members are eligible for early retirement upon attaining the age of 50 and 28 years of service in the first year of implementation and age 50 and 25 years of service in subsequent years. Those who select early retirement under these conditions will receive monthly benefits equal to 75% of their average compensation, which is computed based on the highest thirty-six months of compensation recognized by the System. Effective July 31, 2001 the option for early retirement was closed. Employees and Employers special contributions related with the program lasted until fiscal year ended on June 30, 2006.

3. Funding Policy

The law requires the employer to contribute 8.5% of the applicable payroll. Participating employees are required to contribute 9% of their compensation. Commonwealth contributions should ultimately cover any deficiency between the participating employees' contributions and the System's pension benefit obligations and administrative costs. The employer and participants' contributions will be evaluated at least every five years.

The special contributions of approximately $61,066,000 and $60,853,000 in 2006 and 2005, respectively, represent the contribution from the General Fund of the Commonwealth for the benefits granted by special laws.

Calculations of the present value of benefits under the System were made by consulting actuaries as of June 30, 2004, using the entry age normal actuarial cost method. Significant assumptions underlying the actuarial computations include: (a) assumed rate of return on investments of 8%, net of investment expense; (b) assumed compound rate of wage increases of 5% per year; and (c) assumed mortality rate based on the Group Annuity Table for 1983.

The actuarial accrued liability as of June 30, 2004 was approximately $4,702,000,000 As of June 30, 2004, the unfunded actuarial accrued liability was approximately $2,298,000,000.

4. Deposits and Investments

Pursuant to the provisions of Act No. 91 of March 29, 2004 that superseded Act No. 218 of 1951, as amended, the System may invest in different types of securities, including domestic, international and fixed income securities, among others.

During the year 2005 the System adopted GASB Statement No. 40 "Deposit and Investment Risk Disclosures" an amendment of GASB Statement No 3.

Deposits

Cash with fiscal agent has an overdraft and surplus of approximately ($13,949,000) and $2,853,000 as of June 30, 2006 and 2005, respectively.

Restricted cash of approximately $1,717,000 and $1,595,000 as of June 30, 2006 and 2005, respectively, is held in escrow by a commercial bank, as trustee (the Trustee), for purposes of servicing the bonds payable (see Note 9).

Custodial credit risk for deposits is the risk that in the event of bank failure, the System may not be able to recover deposits that are in the possession of an outside party. The System has bank deposits not collateralized with the GDB. Cash deposited with GDB amounted to approximately $2,993,000 and $3,536,000 as of June 30, 2006 and 2005, respectively.

Investments

The following table shows the market value of the investments in marketable securities held by the System as of June 30, 2006 and 2005 (in thousands):

	2006	2005
US Government and agencies' securities	$ 294,288	$ 140,807
US Corporate bonds	169,186	116,223

Total Investments	$ 2,396,314	$ 2,134,945

4. Deposits and Investmen ts (Continued)

Cash and cash equivalents and investments include approximately $29,384,000 and $59,132,000 as of June 30, 2006 and 2005, respectively, held as pledge collateral by the custodian bank in connection with the bonds payable (see Note 9).

The System's investments are exposed to custodial credit risk, credit risk, concentration of credit risk, interest rate risk, and foreign currency risk. Following is a description of these risks as of June 30, 2006.

Custodial Credit Risk

Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the System may not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. At June 30, 2006 securities investments were registered in the name of the System and were held in the possession of the System's custodian bank, State Street Bank and Trust.

Credit Risk

The System's investment guidelines prohibit the investments in securities with maturity dates beyond thirty years. All fixed income securities at the time of purchase must be of investment grade quality. Positions that drift below investment grade should be reported to a management representative of the System and monitored carefully. The portfolio is not expected to have more than 5% invested in securities that have drifted after purchase below investment grade quality. All issues shall be rated investment grade by at least two of the nationally recognized rating agencies. The portfolio is expected to maintain a minimum weighted average credit quality of either "A" or better using either Moody's or Standard and Poor's credit ratings.

Concentration of Credit Risk

There are no investments in any one issuer that represent 5% or more of total investments as of June 30, 2006. The System's investment guidelines specify that no more than 5% of a manager's assets at market shall be invested in the securities of any single issuer.

Interest Rate Risk

The System is expected to achieve capital preservation and income generation by investing in a diversified portfolio of marketable, investment grade core fixed income securities. The System's investment guidelines specify that the duration of the portfolio is expected to vary no more than between 75% and 125% of the duration of the respective benchmark. Securities with maturity dates beyond thirty years are prohibited.

4. Deposits and Investments (continued)

The following table summarizes the investments on debt securities of the System at June 30, 2006 (in thousands):

			Investment Maturities (In Years)			
	Maturity from	Fair Value	Less than 1	1-5	More than 5-10	More than 10
US Government and agencies securities	(2006-2043)	$ 294,288	$ 24,951	$ 106,363	$ 35,791	$ 127,183
Corporate Bonds	(2006-2036)	169,186	1,441	46,905	57,143	63,697
Total Bonds and Notes		$ 463,474	$ 26,392	$ 153,268	$ 92,934	$ 190,880

As of June 30, 2006, investments maturities are as follows:

Maturity	Maximum Maturity
Less than one year	6%
One to five years	33%
More than five to ten years	20%
More than ten years	41%

4. Deposits and Investments (continued)

Foreign Currency Risk

The international portfolio is expected to achieve long-term, aggressive capital appreciation by investing in Core EAFE (Europe Australasia and the Far East) securities. The portfolio is expected to be broadly diversified with respect to exposures to countries, economic sectors, industries and individual stock. No single issue is expected to exceed 5% (at market) of the portfolio.

Investments exposed to foreign currency risk as of June 30, 2006 and 2005 are as follows:

Investment Type	Local Currency	Market Value 2006	Market Value 2005
Foreign Currency	South African Rand	$ 719,006	
Foreign Currency	Japanese Yen	312,005	167,855

4. Deposits and Investments (continued)

Investments in Limited Partnerships

The System invested approximately $3,449,000 in limited partnerships during the fiscal year ended June 30, 2006. The investments were as follows:

- During fiscal year 2006 there were no contributions to Guayacán Fund of Funds, L.P. a Delaware limited partnership created by Grupo Guayacán, Inc. as General Partner in which the System has a total commitment of $20 million. The Fund has commitments to invest in 15 US based and international venture partnerships and ties local pension funds with the private equity asset class without the risks inherent in geographically constrained investments.

- During fiscal year 2006, there were no contributions to Guayacán Fund of Funds II, L.P. a Delaware limited partnership created by Grupo Guayacán, Inc. as General Partner in which the System has a total commitment of $25 million. The Fund seeks to provide investors with a superior investment return and extensive diversification by investing in 19 Private Equity investment partnerships in the United States and Europe. The Fund also invests a portion of its assets in a Puerto Rico based Private Equity investment entity.

- During the fiscal year 2006, $476,758 were invested in Guayacán Private Equity Fund, a limited partnership organized pursuant to the laws of the state of Delaware and authorized to engage in business in the Commonwealth of Puerto Rico, in which the System has a total commitment of $5 million. The purpose of the Partnership is to make equity investments in privately held companies as established in its charter.

- During the fiscal year 2006, $752,295 were invested in Invesco Venture Partnership Fund III, L.P. a Delaware limited partnership, organized by IPC Partnership Associates III, LLC as General Partner in which the System has a total commitment of approximately $5.5 million. The Partnership was organized to invest in other collective investments funds investing in alternative assets, including primarily United States and international funds that focus on both early and later-stage venture capital investments.

- During the fiscal year 2006, $677,436 were invested in Invesco Non-U.S. Partnership Fund III, L.P. a Delaware limited partnership, organized by IPC Partnership Associates III, LLC as General Partner in which the System has a total commitment of $4.5 million. The Partnership was organized to invest in other collective investments funds investing in alternative assets, including primarily investments focusing on non U.S. buyouts, expansion capital, turnaround, mezzanine, and distressed investment partnerships.

4. Deposits and Investments (continued)

- During the fiscal year 2006, $910,224 were invested in Invesco U.S. Buyout & Expansion Capital Partnership Fund III, L.P. a Delaware limited partnership, organized by IPC Partnership Associates III, LLC as General Partner in which the System has a total commitment of approximately $3.7 million The Partnership was organized to invest in other collective investments funds investing in alternative assets, including primarily investments focusing on small, mid-size and large domestic buyout transactions.

- During the fiscal year 2006, $633,165 were invested in Chase Capital Partners Private Equity Fund of Funds II, LTD a limited partnership, organized by Chase as General Partner in which the System has a total commitment of $15 million. The Fund's investment strategy is to capitalize on a globally diversified portfolio of private equity investment opportunities across various sectors including buyouts, growth equity, venture capital and other special situations through partnership investments and direct investments.

The fair value of these investments at June 30, 2006 amounted to $ 46.2 million and is presented within other investments in the statement of net assets. The allocations of net gain and net loss to limited partners are based on certain percentages, as established in the limited partnership agreements.

As of June 30, 2006, the System had capital commitments and contributions as follows (in thousands):

	Total Commitments	Fiscal year Contributions	Cumulative Contributions	Market Value
Guayacán Fund of Funds	$ 20,000	$ -	$ 18,263	$ 7,396
Guayacán Fund of Funds II	25,000	-	19,639	16,917
Guayacán Private Equity Fund	5,000	477	4,407	5,235
Invesco Venture Partnership Fund III, LP	5,498	752	3,678	3,228
Invesco Non-US Partnership Fund III, LP	4,500	677	3,941	3,775
Invesco US Buyout & Expansion Capital Partnership Fund III, LP	3,716	910	2,478	2,530
Chase Capital Partners Private Equity Fund of Funds II, LTD	15,000	633	13,450	7,134
Total	**$ 78,714**	**$ 3,449**	**$ 65,856**	**$ 46,215**

4. Deposits and Investmen ts (continued)

Securities Lending Transactions

The System participates in a security lending program whereby securities are transferred to an independent broker or dealer in exchange for collateral in the form of cash, government securities and irrevocable bank letters of credit equal to approximately 102% of the market value of the domestic securities on loan and 105% of the market value of the international securities on loan, with a simultaneous agreement to return the collateral for the same securities in the future. Collateral is marked to market daily and the agent places a request for additional collateral from brokers if needed. The custodian bank is the agent for the securities lending program.

At year end there was no credit risk exposure to borrowers because the amounts the System owes the borrowers (the collateral) exceeded the amounts the borrowers owe the System (the loaned securities). At June 30, 2006, the collateral received represented 101.36% of the fair value of the domestic securities lent and 103.92% of the fair value of the international securities lent.

The securities on loan for which collateral was received at June 30, 2006 consisted of the following:

Securities Lent	Fair Value 2006
US Corporate Bonds	$19,653,600
US Government	61,925,259
US Equity	72,222,838
Non-US Equity	49,818,757
Total	$203,620,454

The underlying collateral for these securities had a market value of approximately $207,665,276 as of June 30, 2006. It represented cash collateral and was invested in the lending agent's short-term investment fund. As of June 30, 2006 the short-term investment fund's distribution by sector was as follows:

Asset-Backed	34.24%	Repo	5.83%
CD	21.25%	ABCP	3.53%
Corporate	18.31%	CP	1.50%
Bank Note	8.43%	Deposit Note	0.02%
TD	6.90%		

4. Deposits and Investmen ts (continued)

Under the terms of the securities lending agreement, the System is fully indemnified against failure of the borrowers to return the loan securities (to the extent the collateral is inadequate to replace the loaned securities) or failure to pay the System for income distributions by the securities' issuers while the securities are on loan. In addition, the System is indemnified against loss should the lending agent fail to demand adequate and appropriate collateral on a timely basis.

5. Capital Assets

Capital assets additions are recorded at cost. Depreciation is provided using the straight-line method over the useful life of the asset. As of June 30, 2006 and 2005, changes in capital assets consisted of the following (in thousands):

	Estimated Useful Life (in years)	Balance June 30, 2005	Additions	Retirements	Balance June 30, 2006
Depreciable					
Building	40	$ 26,008			$ 26,008
Furniture and equipment	4-10	5,038	419	(1,399)	4,058
Capital leases	5	106			106
Improvements	10	39			39
Vehicles	5	21	21		42
		31,212	440	(1,399)	30,253
Accumulated depreciation and amortization		(9,374)	(1,216)	1,235	(9,355)
Non-depreciable					
Project in-progress		4,368	399		4,767
		$ 26,206	$ (377)	$ (164)	$ 25,665

On August 1, 1996, the System acquired the North Tower of Capital Center (the Building) located in Hato Rey to serve as the System's main office facilities and to lease the additional space to third parties. Approximately one-half of the Building is being used for its operations and the other half for rental. The Building was financed with Industrial Revenue Bonds (see Note 9).

6. Other Assets

At June 30, 2006 and 2005, other assets consisted of repossessed and in-substance foreclosed properties amounting to approximately $691,000 and $600,000, respectively. Repossessed and in-substance foreclosed properties consist mainly of properties acquired or to be acquired upon foreclosure proceedings as collateral from delinquent mortgage loans. Foreclosed properties are valued at the outstanding principal balance of the related mortgage upon foreclosure. These will be sold under a bidding process intended to recover the outstanding principal balance.

7. Obligation under Capital Leases

During the fiscal year ended June 30, 2004, the System acquired office equipment under capital leases in the total amount of $105,709, that expire in January 2009 and the annual interest rate is 3.75%. The assets and liabilities under capital leases are recorded at the lower of the present value of the minimum lease payments or the fair value of the asset. The assets are amortized over the lesser of their related lease terms or their estimated productive lives. Amortization of assets under capital leases is included in the depreciation expense for fiscal year ended June 30, 2006.

Following is a summary of equipment under capital lease and accumulated amortization as of June 30, 2006 (in thousands):

Equipment under capital lease	$ 106
Accumulated amortization	63
Book value	$ 43

The future minimum lease payments under capital leases and the net present value of the future minimum lease payments as of June 30, 2006 for each of the next five years are (in thousands):

Year ending June 30,	Amount
2007	$ 23
2008	23
2009	14
Total minimum lease payments	60
Less amount representing interest	3
Present value of minimum lease payments	$ 57

8. Line of Credit

The System has a line of credit with the GDB of $15,000,000, which is due on October 31, 2010 and is guaranteed by a pool of investments of the System. As of June 30, 2006 and 2005, the outstanding balance of the line of credit was approximately $4,000, at a variable rate subject to LIBOR, but not less than an annual interest rate of 5%.

9. Bonds Payable

On August 1, 1996, the System entered into a loan agreement with the Puerto Rico Industrial, Tourist, Educational, Medical and Environmental Control Facilities Financing Authority (the Authority), which secured the Authority's issuance of $26,945,000 of Industrial Revenue Bonds (the Bonds). The Bonds were issued under a trust agreement (the Trust Agreement) dated August 1, 1996, between the Authority and the Trustee. The Bonds are secured by a pledge of certain marketable securities of the System.

The proceeds from the sale of the bonds were loaned by the Authority to the System to (i) finance the acquisition of the Building; a sixteen story mixed use office and commercial building and a portion of the adjoining seven story parking facility and (ii) pay certain expenses incurred in connection with the issuance and sale of the Bonds.

9. Bonds Payable (continu ed)

The following is a summary of changes in the bonds payable principal balance:

	Balance June 30, 2005	Additions	Deductions	Balance June 30, 2006
Series A				
6 50% Term Bonds due July 1, 2006	$ 855,000	$ -	$ 855,000	$ -
6 65% Term Bonds due July 1, 2011	5,220,000	-	-	5,220,000
	6,075,000	-	855,000	5,220,000
Series B				
5.50% Term Bonds due July 1, 2016	6,575,000	-	-	6,575,000
5.50% Term Bonds due July 1, 2021	8,635,000	-	-	8,635,000
	15,210,000	-	-	15,210,000
	$ 21,285,000	$ -	$ 855,000	$ 20,430,000

Interest on the Series A Bonds is payable on a monthly basis and for the Series B Bonds semiannually on each July and January. Future minimum mandatory principal and interest payments follow:

	Series A			Series B		
Fiscal Year	**Principal**	**Interest**	**Total**	**Principal**	**Interest**	**Total**
2007	$ 915,000	$ 347,130	$1,262,130	$ -	836,550	836,550
2008	975,000	286,283	1,261,283	-	836,550	836,550
2009	1,040,000	221,445	1,261,445	-	836,550	836,550
2010	1,110,000	152,285	1,262,285	-	836,550	836,550
2011	1,180,000	78,470	1,258,470	-	836,550	836,550
2012-2016	-	-	-	6,575,000	3,499,375	10,074,375
2017-2021	-	-	-	8,635,000	1,476,475	10,111,475
	5,220,000	1,085,613	6,305,613	15,210,000	9,158,600	24,368,600

9. Bonds Payable (continued)

The Series A and B Bonds at the time outstanding, maturing on or after July 1, 2006 and July 1, 2016, respectively, are subject to redemption, at the option of the System, in whole or in part on July 2006, or any date thereafter at the determined redemption prices as follows:

July 1, 2006 through June 30, 2007	102%
July 1, 2007 through June 30, 2008	101%
July 1, 2008 and thereafter	100%

10. Guarantee Insurance Reserve for Loans to Plan Members

The System provides life insurance that guarantees the payment of the outstanding principal balance of mortgage, personal and cultural trip loans in case of death of a plan member. This coverage is paid in its entirety by the plan members who obtain these loans from the System. The life insurance rates are determined by the actuary

11. Rent Income

The System is the lessor of an office building for which it has lease contracts that expire between the years 2006 through 2009. The future revenue under the existing operating leases is as follows (in thousands):

Fiscal Year Ending	Amount
2007	$ 411
2008	420
2009	42
	$ 873

12. Commitments

The System leases offices for the operation of its regional offices (Ponce, Mayagüez, Arecibo, Humacao) and maintains four contracts for this purpose that expire between the years 2006 through 2008.

The minimum future payments under the existing operating leases are as follows (in thousands):

Year	Amount
2007	$ 61
2008	9
	$ 70

13. Contingencies

Loss Contingencies

The System is a defendant or co-defendant in various lawsuits resulting from the ordinary conduct of its operations. Management and legal counsel believe that there are no contingent matters that would have a material adverse effect on the System's financial status.

Gain Contingency

The System, besides receiving contributions from participants and the plan sponsor, also receives legislative appropriations from special laws to cover the increase in benefits to retired teachers. Law No. 62 of September 4, 1992, as amended, establishes an increase of 3% in pension annuities every three years for those members who meet the requirements. In addition, there have been other laws that granted benefits; such as, Summer and Christmas bonuses, and medical plan contributions, among others. Most of the funds used to cover these benefits are budgeted by the Commonwealth through legislature appropriations. Nevertheless, the costs of pension benefits that increased from 1992 to June 30, 2004 were not received in full by the System from legislative appropriations. The System had to cover $119,575,193 from its resources that should have been received through special laws. As of June 30, 2006 the System has a claim with the Office of Management and Budget to collect this amount as per a resolution approved by the Board of Trustees on May 31, 2004. Since the parties involved in this claim are under a decisions committee the amount claimed has not been accrued in the System's financial statements.

Notes to Schedules of Trend Information

June 30, 2006

1. Schedule of Funding Progress

The Schedule of Funding Progress provides information about the funded status of the System and the progress being made in accumulating assets to pay benefits when due.

2. Schedule of Employer Contributions

The Schedule of Employer Contributions provides information about the annual required contributions (ARC) and the extent to which contributions made cover the ARC. The ARC is the annual required contribution for the year calculated with certain parameters, which include actuarial methods and assumptions.

3. Actuarial Data

The information presented in the schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuation follows:

Valuation Date	June 30, 2004
Actuarial Cost Method	Entry age normal
Amortization	Level percentage closed
Remaining Amortization Period	16 years
Asset Valuation Method	Market value of assets
Actuarial Assumptions:	
Investment rate of return*	8.00%
Projected salary increases*	5.00%
Inflation	3.50%
Cost of living adjustment	None

* Includes inflation at 3.5%
